**Essay Question**

Anya and Bea were business partners in a male modeling agency called Fashion Faces. The agency was very successful and became known for finding and launching the careers of new and fresh faces. As part of a new reality television series, Fashion Faces went on the road throughout the United States to search for America's Next New Face.

In their search for America's next new face, Anya and Bea interviewed thousands of handsome and beautiful young men. They often joked that their interviewees made a nice genetic pool of potential sperm donors. Dr. Filler treated Anya for depression and provided her with a large quantity of the "party drug" called gamma hydroxybutyrate (GHB). After interviewing Leo, a potential model, Anya and Bea invited him to dinner and mixed his drink with a combination of GHB and Viagra. After Leo lost consciousness, Anya and Bea each had sexual intercourse with Leo. Anya and Bea froze Leo's sperm and sold it to Dr. Filler, a fertility specialist. Leo had no recollection of the evening other than his dinner with the ladies.

Anya and Bea used the GHB to collect sperm from another potential model, Marcel. After drinking the mixture of GHB and Viagra, Marcel had a violent reaction to the drugs and began vomiting. Anya and Bea quickly drove Marcel to a local hospital. While the unconscious Marcel waited for medical attention, Dex mistakenly identified Marcel as a rival gang member and stabbed Marcel. Marcel never regained consciousness and died 13 months later. Anya and Bea sold Marcel's sperm to Dr. Filler.

The following month, Anya and Bea interviewed Nash as their next potential model and gave him the mixture of GHB and Viagra. After Nash lost consciousness, Anya began to have sexual intercourse with him, but Nash began to vomit and choke. Unbeknownst to Anya and Bea, Nash died during sexual intercourse with Anya. Anya and Bea drove Nash to the hospital and left him there for medical treatment. They sold Nash's sperm to Dr. Filler.

The police investigation into the deaths of Marcel and Nash have led them to Anya, Bea, and Dr. Filler. Anya and Bea both claim that they did not believe they were committing the crime of rape since they are women. Medical testing has shown that Anya has an extra female chromosome resulting in a rare condition known as the Super Female. Some medical experts believe that Super Females are unable to control their sexual behavior. Bea claims that she was afraid of Anya and that she was not acting of her own free will. Dr. Filler claims to have no knowledge of Anya and Bea's illegal activities.

1. What crimes, if any, have Anya, Bea, and/or Dr. Filler committed against Leo, Marcel, and Nash? What defenses are likely to be raised?
2. What is the likelihood of obtaining a conviction on any of the crimes charged?
3. If Anya is convicted of any sex crimes, can the State punish her by requiring that she undergo hormone therapy for the rest of her life?
