Workplace Monitoring

Workplace monitoring may be conducted by GGU to ensure quality control, employee safety, security, and customer satisfaction.

Computers furnished to employees are the property of GGU. As such, computer usage and files may be monitored or accessed.

GGU may conduct video surveillance of non-private workplace areas. Video monitoring is used to identify safety concerns, maintain quality control, detect theft and misconduct, and discourage or prevent acts of harassment and workplace violence.

Because GGU is sensitive to the legitimate privacy rights of employees, every effort will be made to guarantee that workplace monitoring is done in an ethical and respectful manner.
